ROBLOX collects account information from users using its Trusted ID system. The process is designed to make it easier for ROBLOX to provide players with a personalized experience and more opportunities to earn credits online. The program does treat user privacy concerns seriously, however, and requires notice before any account information becomes public. Players can adjust their personal settings on their profile page on the website.

The roblox fly hack is not an entirely trackable game. It has been used to cheat on the game, blow up your inventory with limitless weapons and even get the creator's account. The game uses a form of tracking that makes it possible for people to use loopholes in the system and also detect when someone is using these glitches. The creators of the game have done research into ways to combat this issue, however, no viable solution has been found thus far.

Roblox users sometimes experience glitches that can let them bypass the moderation system. For example, if a moderator sends you a message and you reply right after they ban you, it will say that your message could not be delivered because they are moderating (unless you previously muted or blocked the user).

The purpose of this update was to improve the player's experience of ROBLOX's website and also earn more revenue for ROBLOX by making users spend more time on their website (thus charging users extra money). The biggest change in this update was the live chat feature, which allows players to communicate with other players while playing and has recently been updated to be implemented directly into every game on the site.

On December 18th, 2019, ROBLOX announced their controversial decision on how they plan on handling moderators in the future.[106] This caused controversy within the community as many moderators believed they wouldn't be able to perform their job correctly due to ROBLOX's change of plan.
