ROBLOX is also one of the first websites to allow users to play multiplayer games with each other using video chat (most notably Skype). Over the course of the game, players can interact and communicate with each other through 'conversations'. ROBLOX also used Skype for video chat in many of their games. Some unofficial ports of ROBLOX that are based on Build include Mac OS X, Xbox 360, iOS and Raspberry Pi. The Raspberry Pi port allows users to use a Kinect sensor or USB webcam. Mac OS X includes ROBLOX support built into the client and includes limited support for input from keyboards and mice using DirectInput, as well as support for NVIDIA 3D Vision.

There are many ways that one can use the free robux script and some include:

- Automating tasks to make the user's future activities easier. This is done through combining several programs for people who have multiple social media platforms like Instagram, Facebook, etc.
- Easy access to relevant posts for the user's activities including Facebook posts and other social media outlets. This is made possible since the user's feed will be full of relevant articles, which lead to increased engagement by other users.
- Helping users save time and energy from carrying out repetitive tasks all over again. This helps an individual save their time on different activity by having their schedules automated using a free robux script.

Rated 5 out of 5 by Anonymous from The best game ever! ROBLOX is one of the greatest games I've ever played. It lets you make your own adventures with your friends or in single player mode! This game I'd give a 10/10 because you can build anything you want, and there are still many things to do. For example, if you're tired of building things, there are games to play on Roblox. You can be a police officer, a fire fighter, or even an architect! Roblox is a truly awesome game that needs to be experienced!

If you are a new player to Roblox then I would definitely recommend this game. This is because the game offers a lot of different features, and it even allows you to earn points from playing and completing different quests.

On November 7, 2017, Roblox released their first real let's play channel, but it only lasted a couple of months before Roblox cancelled its plans for let's play channels. It stars RandomPlayer as he plays a wide variety of games on ROBLOX, including many popular games such as Angry Birds and Zombieland.
