On December 10, 2018, the "Free robux" cards system was removed by ROBLOX. Many players believe that this was done due to scamming of codes and due to players complaining about receiving cards they didn't want.

ROBLOX has created a number of recurring events over the years. On October 23, 2012 Robotcrab had announced a new way for Roblox users to make money by selling virtual items in the Roblox catalog: the "Builders Club". Players use Roblox's in-game currency, called ROBUX, to purchase items which they can sell to other players.

The CEO and founder of Roblox is David Baszucki, who is also known as "Devdog". He made his first \$1 million by using a stock option from a company that he had worked at called Original Media. He was fired from the company for not coming up with any new products despite having achieved success in the existing ones. After this, he started to work on ROBLOX alongside his friend Owen Hill. Although Roblox was founded only in 2009, they had already made their first \$1 million by 2013.

The game's worlds are different from most games on Roblox, because they are not based around themes. This makes the game easier to navigate when learning how the world works, and also allows for more creativity in the types of things that can be made. The world is made up of a variety of things; buildings, vehicles, furniture and objects such as weapons and armor. Each item has its own purpose and will function in the way it was intended for.

ROBLOX collects account information from users using its Trusted ID system. The process is designed to make it easier for ROBLOX to provide players with a personalized experience and more opportunities to earn credits online. The program does treat user privacy concerns seriously, however, and requires notice before any account information becomes public. Players can adjust their personal settings on their profile page on the website.
