The "Coin Master: Puss in Boots "(Kasegi 2: Bukimi no Tane)" hack enables players to get unlimited coins and gems. By removing the gems from your inventory, you will still have the game unlocked as well as all the features that come with it! You can install the mod in two ways: permanent and temporary. You can use the permanent version to avoid any in-app purchases or data loss. The tool also contains a blacklist which you can use to block certain games from being hacked. This means that if you encounter a game that has been blacklisted by your device, then it will not be hacked by our tool. The temporary version is meant for people who do not want to use the permanent version, and it is a safer way to get your game hack. Download [Android - Permanent]",

In October 2016, United Pixelworkers announced that they had partnered with game publisher Humble Bundle to make the company's September Humble Monthly subscription service available on "Coin Master" mobile devices.",

Raiding by jdjebdndjdkd on 2018/03/28 18:34 Ok so I love the game but I was playing in the classroom and I got attacked by someone else while I was playing it. And I lost all of my troops along with half of my castle. I didn't make it through the game to see if my troops came back but it was just devastating. If you can make the game a little more fair like your secret messages and if there is a new army system that is way more fair. And if you do not want people to attack while you are playing. Then maybe put an option where we can play one by one in our own kingdoms or have a leader board or something like that? I really love the game but I think some stuff needs to be changed. Thanks if you can take into consideration.",

In 2011 Moon Active released Coin Master for iOS and Android as a free download. This version of the game is completely free and removes all in-game advertisements. However, it now requires a \$0.99 "micro transaction" in order to advance to the next level",
