Coin Master is an "arcade" game that is free to play and does not require the user to pay in order to advance through the levels. Though in-game advertisements were initially planned, Moon Active decided not to use them, making it possible for users to download Coin Master without being interrupted by ads. Instead, they opted for micro transactions and an ad-free version. The developer explains this decision by stating that he does not believe in offering a pay-to-win type game."

On January 11th, 2018 United Pixelworkers announced via their official website that they had partnered with game publisher Bethesda Softworks to develop a new mobile game based on "The Elder Scrolls V: Skyrim". It is currently in development and will be viewed as a spin-off based on the "Coin Master" and "Coins & Curses" games. It is scheduled for 2019. The trailer was later released via Bethesda's official YouTube channel on February 12th, 2018."

On November 17, 2018, Moon Active released Coin Master: Puss in Boots "(Kasegi 2: Bukimi no Tane)" for Android as a free app (it is not available on iOS). This "Coin Master" title features an updated version of the popular video game "Puss in Boots". The game was released in Japan initially as part of Moon Active's "Coin Masters" series. However, this version of the game was never released outside Japan. This version contains microtransactions which can be removed by paying \$4.99 USD via in-app purchases."

Great idea but... by Crhbxxra on 2015/06/20 20:56 I like this game but when you are done with your board there is no reason to go back to it and play again. This makes it really difficult to get more coins. The game should have a reward system that comes in every few days or something. I feel like I am just wasting time playing the same puzzles over and over without reward."

Crashes by Tessa816 on 2014/08/11 20:36 All of a sudden three days ago, I can't play the app anymore without it crashing at some point during the round. I've deleted and reinstalled it and everything else that goes with that but nothing works... There are no updates or anything so I'm not sure what has happened..."
