On June 26th, 2018, ROBLOX CEO John Hanke made an announcement on Twitter that the company would be removing the ability to create avatars for users within games and requiring new avatars to be created instead. Once this update was implemented however, users were able to create new models based on existing ones and preserve them as a template which they could then upload into games alongside their original avatar. This update was to lower fraud within the site with copyright infringement and promoting copyright infringement by bypassing game mechanics by allowing users to create avatars of other users' games.[21]

On February 4th 2019, ROBLOX released some updates for their Studio 2.1. They stated that they would be making many fixes on their website to improve the experience and to make it more stable and bug-free.[95] On February 11th 2019, ROBLOX released "Studio 2.2" which was a major update which contained bug fixes and minor improvements. On February 12th 2019, ROBLOX released "Studio 2.3" which was another smaller update containing bug fixes and minor improvements.[96]

On January 24th, 2019, ROBLOX released a plan for their future development. The main goal is to separate ROBLOX from its animation engine and make it its own game platform.[107] This will greatly cut down on the amount of time it takes to develop games for the site.

One great option is to use your own money to buy robux. This may not seem like an appealing idea at first, but it can provide you with a lot of benefits that are easy to obtain. If you have extra money on your hands, then you should definitely consider investing in robux. Once you have collected enough virtual currency, stop using it and wait for the value of robux to increase over time. With the amount of time that passes by each day, you will see a good return on investment within a few months.

On January 13th, 2019, ROBLOX implemented broader anti-fraud features called "Secure Trading." The system is designed to prevent fraud such as fake accounts/bots, selling stolen virtual currency and more. It is also designed to allow users to trade in a safer environment. [28]
