Roblox has also been criticized for not having realistic physics. Roblox used to have a physics engine, but it was removed in 2015. The reason for this was because ROBLOX wanted to focus on improving their building features instead.[60] However, they later explained that this removal was only temporary and they would bring back the physics again in the near future.[61]

They have also created a website called ROBLOX Studios which allows users to create and upload their own videos to YouTube in order to advertise their videos as well as doing tasks that can be made money such as editing videos, building websites, etc.[47]

ROBLOX originally only accepted payments through cryptocurrency, but later, it was changed to cash prices. The Roblox Corporation is a business that created ROBLOX as well as many other games such as Bloxburg and Bloxburg B.V.. Bloxburg B.V. was a subsidiary company of ROBLOX that was formed in September 2015 to create the HTML5 version of Minecraft. They have created some "Minecraft-like" games such as SEER and INRIX, as well as the HTML5 version of Minecraft itself called "Bloxburg".

On August 15, 2017 (12:00 PM), ROBLOX released a new website design. This redesign adds a many features and improvements such as new search function, expanded news section, easier access to games and groups/communities, expanded mobile version of the site, ability to message anyone on the website regardless of whether they are a user or staff/trade with users without the need to add them first (members must have this feature enabled), expanded trades panel with detailed card information, ability to cancel trades before they are completed when there are no funds involved on either side of the trade to prevent scams that involve giving out items for free and getting items or money in return but never giving back the items that were given.
