Always back up your world:Before installing a mod it is always a good idea to save your world before you do anything else. This way, if something does not work out and you need to uninstall the mod or require a clean save, you will not lose everything. This is very important and we cannot stress enough how important this step is for most players! Install it correctly:Installing mods is different for each of them because they all have different requirements and rules about what files they will change in Minecraft. For example, some mods will just replace certain files while others will replace a lot more. Make sure to read the mod's description and the developer's website and follow them accordingly. If you trust the mod's description or its developer in general then it is probably safe to install it. If you are unsure at all, it would be a good idea to examine each of your files before installing so that you can see if anything has been altered by this mod.",

"Rust's primary gameplay revolves around gathering resources and crafting items in order to survive in a harsh environment riddled with other players. The primary task is to craft weapons, beginning with only a rock and a torch as tools at the beginning of the game. Once enough resources are gathered, tools such as pickaxes can be made in order to speed up collection of resources which are spread randomly across the map. These resources include wood, stone, metal as well as a variety of gas canisters and cloth/thread. Later on in the game, electricity can be generated by

large generators requiring the same gas canisters found earlier in the game.",

Multplayer is a lot of fun when you're in a group with friends and family. But it can also be expensive! In order to play multiplayer on Minecraft, you have to pay. This can get pricey unless you are playing on private servers. I would recommend playing with friends or family because that way it will be easier to ask them for help! It's also a lot more fun with friends than on your own.",

What is a Minecraft Server List? – A Minecraft Server list is a list of servers that you can use to connect to. In order to use one, all you need to do is type in the IP address or host name and then choose one from the list that appears. If you are using a Bukkit or Tekkit server, then there will be some connection issues that need to be sorted out before connecting directly through the IP address or host name. For more information about this, please refer to our article on how to connect to your minecraft server here.",
