All you need to do is to follow the instructions that are provided for you. This should be more than enough for anyone out there to get started with! I would definitely recommend using this method if you are a beginner!

On March 13th, 2018 the ROBLOX website was temporarily shut down due to multiple exploits on the site. With over 200 million players this has become one of the biggest DDOS attacks in history. The site came back online about 30 minutes later.

Farmville: This is yet another example of a game that doesn't really offer any value at all but still manages to make a ton of money. It's a very bizarre concept which involves fun because you think you're going to become rich by buying fake farm products and selling them or you can become popular by posting pictures of your fake farm products and getting attention from people who want similar things. I mean, if this is what people want then it's really no different than Roblox except with Farmville you're dealing with real money.

ROBLOX has official clients for Windows, macOS, Linux, iOS, Android, Xbox One, and PlayStation 4. ROBLOX also has a game engine called "Build" which can be downloaded for free to those wishing to develop games for their website. Although not officially supported by ROBLOX themselves, the client source code is also available on GitHub. As such, there are unofficial ports of ROBLOX to other platforms not supported officially by ROBLOX such as Xbox 360, Raspberry Pi and Tizen. An early attempt at an iPhone port in 2010 was unsuccessful due to concerns over the stability of the platform and a lack of toolchain support.

Although many games on ROBLOX are free, some with "premium" features, others require money for certain features. One example of this is when the players can buy exclusive items that are only available for purchase through Builders Club membership.[53] Before March 2010, premium features were known as paid-for items. As of March 2010, all premium items in a game are referred to as "Builders Club Premium."
