Productivity Tools: ROBLOX has released many tools to players in the past. Some of them have been useful to players, while others prove to be more controversial. The most recent ones were their "Full Studios" which had many features and tools that allowed players to go into the game engine and change things remotely. However, many users claimed that this was a privacy issue due to the fact Roblox can track all changes, such as the movement of people through the game or make copies of other people's games.

This is mostly used for buying virtual items such as weapons or accessories on Roblox's marketplace and selling them at a profit, which is rather common as people often sell their in-game belongings/items for real money .

On July 19, 2018, ROBLOX launched a new mobile app called ROBLOX Mini. It is aimed towards kids below the age of 6 years old. It allows players to play mini games as well as create items for their mini-game and have a catalog of characters to dress up as.[50]

The news has attracted mixed responses from users. Some believe it's an improvement since it's more reliable, and fixes most of the bugs that caused users to constantly lose their work. Others think that it is useless due to the fact that ROBLOX Studio randomly changes collision methods and there are no descriptions on how to remedy this problem. Some have even started questioning how Roblox handles the games they host as well as some of their policies towards adult players/contents, and other problems like spam bots.
