Roblox is a wonderful platform for any developer to start learning how to code in the real world. Since it's relatively easy to use, it will allow you to create games and apps that will also be easy to use. All you have to do is choose your theme, write a few lines of code and test it out. If people like your app, they will play it and provide you with their feedback so that you can improve your project. Roblox has many features which include multiplayer servers, chat rooms, game rooms and the ability for developers to sell their games or items to other players if they wish. If you are interested in trying out programming, then Roblox would be a great place to start. You will not only have fun but you will learn many things. And who knows, one day your game could be the next hottest thing on the market!

In July 2012, ROBLOX released a list of their top 100 games with the most concurrent players at any one time. The list features a variety of games such as "Rage Place", "Create the Universe 2", and "Survival Games: Mine". The game with the highest number of concurrent players at the time was "Mineblox", which had over 10,000 players on it at once.

In 2012 the company sponsored an event at the Children's Museum of Pittsburgh to raise money for charity (Watsi). This was called Roblox Builders Club: Multiplayer Tournament which raised over \$6,000 for charity water.

However, there is no way to directly transfer items or coins between accounts unless both parties are friends with each other on ROBLOX; however they can work around this by transferring the item to a shared place and trading the item from that point.

ROBLOX Studio 2.0: On December 28th 2018, ROBLOX announced a new version of their Studio known as "Studio 2.0". The company claims that it is meant to be a new version of their previous releases which contains many improvements and better tools. It also allows users to earn cash if they choose to sell their items in the catalog.[91] On January 1st, 2019, ROBLOX updated the game and added a feature which allowed users to get an early access for Studio 2.0.
