HelloRoblox2 works in almost the same way as HelloRoblox. It sends you robux once you've uploaded a video on YouTube. However, there is a slight difference. HelloRoblox2 has been around for a while, and because of this, the robux it can send are easier to get. It generally only sends out 100-200 robux per day. This works out to about 1 free robux per week. If you're in a hurry, HelloRoblox2 is probably better than HelloRoblox.

Floating Balls! I have noticed that when you are at a group world and getting on people's chat heads they should be able to fly around like on normal. We need this because there are so many times where such a little bug would make these people mad if they were floating anywhere near them because they would not know what to say. Even though there are thousands of people in the group there should be more room for them to float. I think that there should be more than one chat head. I have seen people report this bug but it has not been fixed and I really want to see it fixed.

Roblox had an accident with the site in early July 2011 when it was down for several days causing some players to be unable to log onto their accounts and play. The site's status was displayed as up by Roblox staff after a few days but only some experienced players were able to log on within those few days.

There were reports of auto-attack bots from a group called "ArtRage" which was hacked to attack other players in order to force them out of the game, and then to prevent them from ever returning. On April 12, 2014 there was a report from an Arianespace engineer that someone had been "hacking into rocket control computers and maneuvering vehicles on the ground". The players involved were reported to be ArtRage members.

The news has attracted mixed responses from users. Some believe it's an improvement since it's more reliable, and fixes most of the bugs that caused users to constantly lose their work. Others think that it is useless due to the fact that ROBLOX Studio randomly changes collision methods and there are no descriptions on how to remedy this problem. Some have even started questioning how Roblox handles the games they host as well as some of their policies towards adult players/contents, and other problems like spam bots.
