On October 8, 2017, they released a video showing large amounts of bugs and glitches in the game Frostbite. These include several bugs that allow for players to place guns and kill other players in mere seconds. ROBLOX said on their blog that this was due to an "incorrectly prepared prize package" but later stated that it was an error during a new update of their "Prototype Editor", which was supposed to have fixed the issues, but evidently did not.

In order for this generator to work, you need to download it first and then create your account which is very simple. Next, you need to download the game that you want and start playing it by using the app. The generator will connect with your account automatically after a few seconds so it shouldn't take too long. It will only show up a few ads after you have connected your account with the generator so that might not be a problem at all.

ROBLOX has also been criticised for not putting up a good enough amount of effort to make ROBLOX itself safer for players. The site is not very well secured and has been known to have exploits since 2010, like one in the "Spectator Mode" which gives users complete control over other users' games with no checks or balances. It also allows users to upload executable files onto ROBLOX servers without any notification and allows them full access to other user's games and accounts.

On June 26th, 2018, ROBLOX CEO John Hanke made an announcement on Twitter that the company would be removing the ability to create avatars for users within games and requiring new avatars to be created instead. Once this update was implemented however, users were able to create new models based on existing ones and preserve them as a template which they could then upload into games alongside their original avatar. This update was to lower fraud within the site with copyright infringement and promoting copyright infringement by bypassing game mechanics by allowing users to create avatars of other users' games.[21]

ROBLOX released a new website design on August 1, 2017 (10:00 AM). This redesign changes many things for user convenience, also the entire site was re-coded from scratch to be more efficient. The creators of ROBLOX have a goal for ROBLOX to be widely used in all aspects of life and they wanted people around the world to have access to ROBLOX. To achieve that, this redesign is part of their overall plan which includes global expansions.
