Roblox provides wireless headsets in the form of headphones and microphones. This enables players to communicate through the game, chat with other Roblox users, and play games with other players. In some online games, players are able to play "mini-games" such as "Horseball" that involve shooting a ball across the screen to attack another player. However, in Roblox, mini-games give physical feedback from hitting objects in the game world; for example, when they jump off a ledge in an abandoned mine shaft.

On November 10, 2014, ROBLOX launched an invite-only beta for the virtual currency Robux. It was released to a small fraction of its user base whose accounts had been verified by Robotcrab, Inc. The currency was named after ROBLOX's mascot. All games and item purchases could only be made with Robux. The overall value of Robux is dependent on ROBUX exchange rates in the game itself; however, all players are guaranteed to receive the same amount of Robux (at the same time) regardless of their financial situation or how they choose to use them.

Trivia In 2014, ROBLOX created a game called "Tank Trouble" that was very similar to the popular game "Minecraft". This caused a lot of people to leave ROBLOX due to the lack of creativity and stealing other companies ideas. Later on, Minecraft and ROBLOX started exploring ways to work together which ended up in creating an official version of Minecraft on ROBLOX as well as adding multiple features from Minecraft into their site. The official version is called "Bloxburg" and the unofficial version is called "Roxburgh".

If you play "Robloxian life" long enough, you'll notice that the costs really add up. For every point someone wins, the game will cost the player between \$3-\$10 depending on how many points are needed to win a double prize. Although this is not completely true for all games, it does affect most games so players can expect to spend a lot of money just for some points or winning prizes.
