In 2018, ROBLOX announced that it will be taking a chunk of its earnings and give it to the developers among them. Some developers are making over \$5,000 USD per month using ROBLOX. Roblox has had two cases with Microsoft. Roblox was originally banned from Xbox Live due to the game running advertisements which violated Microsoft's Terms of Service by being inappropriate for children. The ads contained anime-style nudity and extreme gore. This was later changed however when Roblox reached an agreement with Xbox Live regarding the matter between them.

On June 26, 2012 (4:00 PM), ROBLOX released a new website design. The new design was made with a goal to have access to the latest news, showcase new games, and improve features in the forums.

On December 20, 2016, a 12-year-old girl in Las Vegas named Arielle De La Rosa was banned from Roblox for what she believed was a "harassment campaign". She had created a character named Emily Roe that she used to bully another player online. The bullying campaign went on for over a year until it came to her parents' attention and they contacted Roblox about it. The harassment campaign violated the Child Online Privacy Protection Act (COPPA). Her parents encouraged her to create a character named "Emily Roe" and they hoped that this would help her get unbanned from Roblox.

Roblox has been criticized for the number of advertisements in their games. In 2016, the company stated that one of their games had over 5 million advertisements. They also stated that over 18% of the players would click on the advertisements.

There is also a Roblox version called Roblox. The most popular online game that users play on ROBLOX is called ROBLOX. World of Warcraft If users want to buy or sell items or craft something for their own use, they will have to move to a different website or app such as the website Craigslist or the app Facebook. Facebook Came out with its own version of ROBLOX where users can create their own play spaces and interact with other players in real life. This was done by connecting their app through WiFi so that every user can interact with one another in real life. PlaceVille Came out with its own version of ROBLOX where users can create their own play spaces and interact with other players in real life. This was done by connecting their app through WiFi so that every user can interact with one another in real life. [130]
