If that never happens then the servers are going to crash and the game will die. If you take a look at the way ROBLOX's developers are trying to make even more money, you will see that they do not want to add any real value to their games. They want people to spend real money for fake money (robux) so they're going to make it so that it's impossible for someone who doesn't pay for robux to exist within their virtual world.

Rated 5 out of 5 by Anonymous from The Best This game is amazing, there are so many games to do and you can create your own things on ROBLOX Studio which is the best place to make an awesome computer game which has a lot to do like build houses or build weapons or play games with friends. I love this game and I recommend it to anyone who loves games! Rated 4 out of 5 by Anonymous from The best online game! I've played Roblox for a long time now. It's a unique experience of its own, and it's the best online game for anyone. I love this game! :)

In July 2018, Roblox had allegedly banned several high-profile creators due to the fact they made violent games. Although Roblox claims users were banned "due to improper behaviour" nothing has been proven yet. The situation is occurring in many forums and websites. In July 2018, ROBLOX put out a statement saying that they did not ban any creators, but instead were involved in a legal dispute with the people who claimed to have been banned.[82] They later said that anyone who was banned for making offensive content was "part of an organized effort by bad actors to scam our users. We have no tolerance for this behavior and we're doing everything we can to protect our community." [83]

UPDATE: There are many different ways of earning free Robux. When I first wrote this guide, the most effective way of earning free robux was playing games. This is still true today. But now that new generators have been discovered, players can now earn free robux without playing games like they used to. The best one is HelloRoblox and its sister site HelloRoblox2 .

Roblox has also been criticized for not having realistic physics. Roblox used to have a physics engine, but it was removed in 2015. The reason for this was because ROBLOX wanted to focus on improving their building features instead.[60] However, they later explained that this removal was only temporary and they would bring back the physics again in the near future.[61]
