Roblox users sometimes experience glitches that can let them bypass the moderation system. For example, if a moderator sends you a message and you reply right after they ban you, it will say that your message could not be delivered because they are moderating (unless you previously muted or blocked the user).

In 2014, ROBLOX took the block system offline due to an exploit that allowed users to convert infinite amounts of blocks into real currency. They eventually brought it back online after fixing the exploit.

On August 9, 2016, ROBLOX launched the first RoblEX game, called "RoblEX: The Lost Robots". A new currency was also introduced in this update called "RoblECX" (Robux in a different form). This was the first time that RoblECX were ever used. Before this update Robux were used on both games and non-games.

On April 27, 2018, ROBLOX released its own virtual reality headset on their website known as the "ROBLOX Visor." The headset is created in collaboration with Carl Zeiss AG. The headset has a retail cost of $99 USD and comes with an HD screen capable of playing 2D and 3D content. The headset was also officially launched at E3 2018.

ROBLOX released a new website design on August 1, 2017 (10:00 AM). This redesign changes many things for user convenience, also the entire site was re-coded from scratch to be more efficient. The creators of ROBLOX have a goal for ROBLOX to be widely used in all aspects of life and they wanted people around the world to have access to ROBLOX. To achieve that, this redesign is part of their overall plan which includes global expansions.
