On September 20th, 2018 a man by the name of Mathew T. Livingston was arrested for allegedly impersonating another user, and then luring children into sending him explicit photos and videos of themselves. He would then threaten the children with the videos if they would not send him more. [40] [41]

Roblox provides wireless headsets in the form of headphones and microphones. This enables players to communicate through the game, chat with other Roblox users, and play games with other players. In some online games, players are able to play "mini-games" such as "Horseball" that involve shooting a ball across the screen to attack another player. However, in Roblox, mini-games give physical feedback from hitting objects in the game world; for example, when they jump off a ledge in an abandoned mine shaft.

In ROBLOX, safety is one of the main concerns facing parents. The website can sometimes be a risky place for children because they sometimes come across people being rude, bullying, etc. [138]. ROBLOX is doing its best to make sure that its users stay safe while playing games. First, ROBLOX has safety features in place. A "report user" button is at the bottom right of every player's screen. This button appears if someone is acting rude to you in a game. Pressing it leads you to a page where you can add as much detail as you can about what happened and why it was wrong. The person reading the complaint will then investigate the situation and take necessary actions towards offending players. Players have also found ways to use this button for wrong reasons, like falsely reporting users to get them banned from playing ROBLOX.

Several Roblox songs have been made over the years. The most popular song is "Everyday ROBLOX", which has over 2.5 million views. The song is about every day life on ROBLOX and is very catchy.

It is important to know how hackers gain access to Roblox accounts because of its impact on society. Hackers love discovering new ways to hack into people's accounts and bypass security measures that have been set up by Roblox. In order for this problem to be solved, it is not just up to Roblox but also the users who play it as well. Roblox needs to be more active in providing information on this issue and what hack protection measures are available to its users. Roblox also should be alerting people when they are hacking or when their accounts have been hacked.
