ROBLOX makes it easy for users to participate in local multiplayer games. For example, a user can connect three iPads together and play the game Invader ZIM on them. There are also games where players connect their computers through WiFi and play online games with one another, such as Minecraft. You can also use RoomBuddy to track where your room members are located, so you don't have to worry about them leaving your house unsupervised.

Safe for kids. The roblox website has a large system dedicated to ensuring that all content is safe - filled with age requirements and parental controls to provide protection from inappropriate content being found and viewed by children playing the game online. This is a great safety feature that provides peace of mind for parents looking to let their children play on it. Requires an internet connection to play. This is a small downside and something that can be fixed by using a Wi-Fi connection.

One of ROBLOX's main rivals is Tencent, a Chinese company. The two companies even share employees and developers, including the current admin. ROBLOX as well as Tencent are often compared to each other due to their similarities.
