In February 2014, Big Fish Games released ROBLOX for iPhone, iPad and iPod Touch devices. The game was pulled from the App Store in August 2014. In August 2016, ROBLOX launched a group messaging app, which uses an algorithm that allows users to receive messages from anyone they have played with or interacted with in any way, even if the users have not been added to each other's friends list.

Productivity Tools: ROBLOX has released many tools to players in the past. Some of them have been useful to players, while others prove to be more controversial. The most recent ones were their "Full Studios" which had many features and tools that allowed players to go into the game engine and change things remotely. However, many users claimed that this was a privacy issue due to the fact Roblox can track all changes, such as the movement of people through the game or make copies of other people's games.

The free robux script is designed as a means for individuals to have a great time managing their Instagram feeds and other social media accounts. On the subject of Instagram, there are different posts that have been made and this is one of the reasons it is useful for an individual to use since it helps them save time from filling up their Instagram feed with the same post.

As of April 2018, there are over 2,000 games on Roblox. Many of them are "clones" of other players' games made by other players, which can lead to copyright issues if the original creators do not want to share their work. Players may be able to report these games as well as block people who play them from their online profiles or in-game friends list. Some games have caused controversy with their focus on violence, sexuality and racism. However, Roblox staff have stated that the problem lies in the people who play these games, not in the games themselves.
