As a Roblox developer, you have the advantage of being able to learn new things from other people's games. You do not need to start from the scratch because there are thousands of ongoing games that you can play and then copy. There are many ways to make money on Roblox since it is a free app. You can make money by selling your skills as a developer, becoming an affiliate, making money through advertisements or charging for certain items in your game. You can also make Robux by doing roblox sponsored ads.

ROBLOX also shares user information such as email addresses with any business partners that are directly involved in the provision of ROBLOX services, such as developers and advertisers. ROBLOX reserves the right to send or share non-personal information with third parties in order to assist them in providing accurate behavioural advertising and targeting.

On December 30th, 2011, Roblox sent a DMCA notice to Awaited Studios to take down "Infinity: The Quest to the End of the Universe" after noticing that they were releasing code from ROBLOX in their game. Since then, the company has kept all of its released code in a separate source file called "robux".

I like roblox but it is still not better than minecraft in my opinion because minecraft have so much stuff, people can do a lot of stuff. I think Roblox needs to get a lot of money so they can improve more stuff than they already got. I love roblox but I still think that it could be way better, so here is some of my ideas 1. It should have better graphics 2. It should have better game servers 3. There should be more new games, but there is a thing what I don't like about roblox is that the games are kind of the same every single time, and you end up playing them too many times 4. The games should either really get harder or really easier

RoblEX is the currency used on many games running in the ROBLOX Universe, such as RarestMonsters and BLOXelation. It was first introduced in 2017 for the game Shooting Challenge 2.In April 2018, ROBLOX introduced a feature referred to as "LocalScripts." LocalScripts enable users to locally execute C# code in-game. They can be used to access the hardware of a device running the game, or manipulate specific parts of the game. For example, by using LocalScripts, developers can create weapons that change their firing rate depending on how fast you pull the trigger.
