In 2003, a new logo was introduced to represent the company: it consisted of a white capital letter "O" on a black background. The logo underwent several changes under various visual design changes during this period. The "O" was sundered into two smaller, green squares with rounded bottoms that closely resembled the shape of the letter "L", which remained in use until 2010. In 2009, ROBLOX released an entirely new logo based on the previous one: this iteration featured a black capitalized "R" on a white background. It was designed to feature the company's name without any visual association to the original logo. The previous logo is still in use today, albeit with a thicker frame.

ROBLOX originally only accepted payments through cryptocurrency, but later, it was changed to cash prices. The Roblox Corporation is a business that created ROBLOX as well as many other games such as Bloxburg and Bloxburg B.V.. Bloxburg B.V. was a subsidiary company of ROBLOX that was formed in September 2015 to create the HTML5 version of Minecraft. They have created some "Minecraft-like" games such as SEER and INRIX, as well as the HTML5 version of Minecraft itself called "Bloxburg".

Due to its age, ROBLOX games often contain bugs and glitches; it can be difficult to get rid of these glitches. Some users have even taken to modifying the game engine to bypass some of these bugs, as well as creating their own games and uploading them to Roblox without permission.

I personally could work on my vocabulary by playing Roblox because they have so many words that you will need to remember. In order to remember these words you can just go through your dictionary or the game and see how many words are similar. This is also good for children because they can learn a lot of vocabulary while playing games; this is similar to learning about a new language in school.

In 2012, ROBLOX changed their logo. In January 2015, ROBLOX released a new website design with a few design quirks (like having your account avatar next to the gamertag that bought it in place of the previously used avatar) and having the games listed bellow on the homepage after some time for initial release followed by a notification saying they are opening more in 2015. On March 31, 2015, ROBLOX officially confirmed that they are making a game in virtual reality and that they will make a demo by the end of summer.
