You must be careful about what items go into your inventory because once it goes into your inventory, it cannot go back out unless you die and respawn at a new random spawn point. Another type of server is a Creative Server. This type of server focuses around the idea of you being able to build anything that your imagination can think of. You don't have to be creative in game; it's similar to Minecraft, but it allows you to be a lot more creative with the blocks and items in the game. There are many different types of servers where you can connect; if you feel like there isn't enough, another way you could connect is by using a private server. A private server is highly customizable and allows even more freedom than a public minecraft server because there are no other people connected to the world at the same time as you. Once you open the app, you will see a screen like the one below. Here is where you will choose whether to use "Infinite Resources" or "Instant Builds". The choices are self-explanatory and do not require any additional explanation. Now, tap on the "Start" button and wait for the progress bar to fill completely. When it does, click on the "Start" button again to begin with the process of downloading Minecraft version 1.8 and its features. Once you've purchased Minecraft, you can start building right away. You'll get access to infinite amounts of all the available blocks and items such as wood, wheat seeds and more. This will help you build whatever you want without having to worry about running out of resources. Even if that is not enough, the Instant Build feature will let you build an infinite number of structures in a snap. As soon as the download process completes, tap on the "Start" button once more and you can instantly begin building your world. The faster and more you play, the more you'll enjoy playing Minecraft. However, even if you don't want to play at all or just once in a while, the hack tool will help you build your structures without having to worry about running out of resources. If there is no issue with downloading it, then tap on the "Start" button and begin building!",
