Some other popular tools for hacking Roblox are involved in using a console to execute commands on another user's account; also, there are commands like .rm in which the user can delete other accounts. One of the common ways that hackers can hack Roblox is by using a proxy service. A proxy server is an intermediary server that acts as an agent between two network entities. A hacker can use a proxy program in order to reach another user's information. When another user logs onto their account using this program, the main computer uses the proxy server first before it accesses Roblox. This hacking method is typically used by spammers to hack Roblox accounts and obtain personal information such as passwords and usernames that are used for cyberbullying. One of the more advanced techniques of hacking Roblox is through phishing. Phishing involves sending an email that is designed to look like it is coming from a trusted source. The email will ask for the users' login credentials or ask them to click on something else like a link or an attachment. If the user clicks on the link, they will be redirected to a fake website that looks like something they have visited before. Hackers can use this method to access other's accounts by using another person's credentials.

ROBLOX's first virtual item was the "Builders Club," which was launched in 2006 and was free to all users. It grants users certain privileges that allow them to create and publish places easily on ROBLOX. The Builders Club is currently $9.99 a month; however, it used to be $6.25 a month until 2014, when it was increased to its current price. The Builder's club has since been discontinued for Xbox One and PS4 users as of December 2018 due to converting the Builder's Club into a Builders Pass which costs $9.99 a month instead of $6.25 a month.
