June 8th 2017 saw the release of Alpha 17, featuring oceanic gameplay mechanics and updated map generation systems. Alongside this was a demo for the game at E3 2017, which included the debut of female players in multiplayer servers alongside an announcement trailer. The trailer was criticized for displaying poor graphics and gameplay.",

After creating an item in the game's crafting system, the item will be unable to be removed from its original shape and will require a lot more resources to re-craft. If the player is killed before they have had time to craft their next item, then any unfinished items they were working on will remain in that shape until they respawn back into the game.",

How to Connect to a Minecraft Server – The way in which you connect to a Minecraft server depends on what kind of server you are using. If you are using a Bukkit or Tekkit server, then the connection will be handled automatically and everything connected through the same IP address. You can connect directly by typing the IP address into your internet browser or the host name of the server. If you are using an individual private server, you will need to know an IP address of where your Minecraft Server is located. The easiest way that anyone can get this information is by going to their router's configuration settings and finding out the IP address given from them. This IP address is different for each device and will be different every time that a person uses it.",
