I have attempted to make a list of all the free Roblox code sites and codes I know of. You should be wary when using these codes, as some do not work anymore or may lead to viruses/malware on your computer. I've also made a list of which sites are safe and which sites are unsafe for you to visit. Please be cautious and do not enter any codes you have found in a comment on Youtube, on Reddit, or anywhere else. Always make sure to read the comments of the videos and follow all instructions before using them.

There were reports of auto-attack bots from a group called "ArtRage" which was hacked to attack other players in order to force them out of the game, and then to prevent them from ever returning. On April 12, 2014 there was a report from an Arianespace engineer that someone had been "hacking into rocket control computers and maneuvering vehicles on the ground". The players involved were reported to be ArtRage members.

On February 2nd, 2019, an announcement was made by ROBLOX as they were planning on allowing users to purchase 'Clips' which are in-game blocks and scenarios that can be used in their games.[108] These Clips would later become part of their new launch system that will be called Studio and released at a later date.

Please make a map creator way better than the one in game just because it's not as organized. There should be more detail to every single item. Make an option that if you move your mouse over an item it will tell you what that is and how to use it and everything else about the item.

On July 31st, 2019 ROBLOX released another version update for Studio 2.1 (known as "Studio 2.1.1") which fixed a lot of major glitches and bugs that were present in previous versions of Studio and also included a better way for players to customize their own physics settings.
