The ROBLOX site and forum have received a lot of criticism from its users regarding many issues, such as: Administrators are able to delete user-created games without warning or notice. Users can't defend themselves since the only way they could do so is by contacting an administrator or lawyer. Administrators can ban users for doing anything they don't like or don't agree with. However, administrators have been known to ban users for no reason at all, usually if the user is a moderator or an insignificant/low-level user.

On February 14, 2018, Roblox was awarded the "Best Educational App" award at the 13th Annual Lovie Awards, hosted by Institute for Family Film and Culture Education. This award recognizes family-friendly and innovative apps.

In January 2017, Roblox permanently banned all accounts that were created by Arielle De La Rosa. The company said it was because of her "continued behavior", which included actions such as creating Emily Roe and harassing other users, as mentioned above. Although she had been blocked from Roblox for over a year, they said their original ban for her had been lifted in November 2016. They also stated that she could no longer be unblocked on their platform because of previous harassment reports against other players. The ban was not for her actions, but instead because of the continued harassment she had done.

On July 26, 2018 (6:10 PM), ROBLOX released a new game called "Roblox Experiment" for mobile. A trailer for the game was released on July 25 and made it's official release on July 26. The game is intended to be used for experimentation and research on mobile devices, as well as a temporary training tool for developers that assist in making future Roblox games/apps/experiments.

On February 11, 2017, ROBLOX announced that they would be suing the website of DinoGaming Network for copyright infringement.[5] It was revealed that DinoGaming Network was using ROBLOX models with permission from their owners. However, DinoGaming's policy on asking for permission to use a model is so loose that any user could have given them permission without knowing it. On March 7th, 2016 the lawsuit ended with a settlement and \$7,500 awarded to ROBLOX. [6]
