On July 8, 2013 (3:00 PM), ROBLOX released a new website design. The old design was getting outdated and had many bugs that prevented users from accessing all of their content. This redesign changed everything to make it easier for everyone. Other improvements include simplified forum viewing/posting, improved chat system, improved site-searching/navigation, and improved ability to manage groups and groups permissions.

Premium game mechanics can also be implemented in free games. However, due to the fact that all premium features are only available in Builder's Club, in most cases they will if there is no way for the developer to obverse this from a third-party mod or script perspective, then it can only be done via a Builders Club Premium [63].

On July 31st, 2019 ROBLOX released another version update for Studio 2.1 (known as "Studio 2.1.1") which fixed a lot of major glitches and bugs that were present in previous versions of Studio and also included a better way for players to customize their own physics settings.

"Robloxian life" has actually changed how people view games now. People used to spend hours and hours in games without even noticing that time has passed because they were involved with the game's world. Suddenly, they realize their time is running out and that no one is helping them out for example.

As of September 13th, 2018, ROBLOX has officially released the feature for all users.[86] On October 1st 2018, ROBLOX added an update which allowed players to make comments and rate their favorite games and places. The company claims that this feature was added to make it easier for players to find games that they actually enjoy playing.
