In December 2016, Roblox changed its website design again.[64] This can be viewed here: Roblox Main Page. An official subreddit was created in January 2012 by user pb_bacon.[65] It has since grown to have over 3,000 subscribers (as of May 2018) and 338 pages (as of May 2018).

ROBLOX makes it easy for users to participate in local multiplayer games. For example, a user can connect three iPads together and play the game Invader ZIM on them. There are also games where players connect their computers through WiFi and play online games with one another, such as Minecraft. You can also use RoomBuddy to track where your room members are located, so you don't have to worry about them leaving your house unsupervised.

They have also created a website called ROBLOX Studios which allows users to create and upload their own videos to YouTube in order to advertise their videos as well as doing tasks that can be made money such as editing videos, building websites, etc.[47]

Some other ways that these generators get more traffic is through sending out promotional codes on social media sites like Twitter or Facebook while also using email marketing techniques.
