The product has received various negative comments on their forums due to the fact that they had broken features, it is unclear why they released the product before fixing all the bugs.

Roblox has been criticized for allowing children to have weapons in their games and for hosting violent games with weapons such as guns and knives. In 2018, the company announced that they would be implementing an age verification system for their games. As a result, on September 19, 2018, Roblox was one of the first services to implement this new feature.

There is a rare item that can be found in some games called "the orb" which is a blue orb looking like thing. It comes from a sound that the game creator puts in the game and if you get it, it can be used as an attack to kill the enemy with or to do other stuff like make you invincible. The orb is very rare to get so it is not really good to use if you do not want to waste the item, but I think that this item should be more common, so we don't have to spend too many robux on it.

In February 2013, Roblox was in violation of Terms of Service that required them to have a minimum age requirement for players.[72] In December 2016, ROBLOX temporarily suspended monetizing accounts and purchases of game currency within their website after it was discovered that many users had been cheated out of money. It is known that they worked with third-party vendors to purchase a limited amount of Robux for specific accounts.[73]

It is also important to understand that when using free robux scripts, it has the potential of causing your activities on different social media outlets to be hacked by other individuals who may be using similar scripts.
