ROBLOX released a new website design on September 17, 2018 (9:00 AM). This update changed many things to help revamp the community and also for users. It includes a revamped chat, which is shown on the right. This update added many new features such as "Continuous Games" and "Better Chat". It also added badges for various events.

On August 9, 2016, ROBLOX launched the first RoblEX game, called "RoblEX: The Lost Robots". A new currency was also introduced in this update called "RoblECX" (Robux in a different form). This was the first time that RoblECX were ever used. Before this update Robux were used on both games and non-games.

The app is really easy to use, you just sign up with your email and then enter your username and password which was created when you registered on Roblox. After that it automatically detects your IP address, and then you can choose which device you would like to receive the advertising on. You can choose from a desktop computer, a laptop or a mobile device. The next thing you do is select the game categories that you would like to play games in such as anime, roleplay, sandbox and more. After making your choices, it will show you ads every 15 minutes and then give you free robux for completing offers. You may also skip an ad if you don't want to watch them when they pop up so frequently.

On September 22nd, 2012, a head developer from the website Games Done Quick sent a cease and desist letter to Roblox because they were using code that he had created without permission. This is one of the few situations where ROBLOX has deleted all of its assets to avoid legal issues.

Rated 5 out of 5 by Anonymous from So much fun I love this game so much! There is no fighting, just chatting with your friends online and there are no missions or quests to complete to play this game. It has no age limit either, so younger kids can join in.
