From June 12th 2018 to July 30th 2019, the Roblox network was under a major DDoS attack from a group called "Apothis Squad". This group was demanding that Roblox pay 10 million US dollars into their Bitcoin account or they would continue to perform DDoS attacks on the site. They also threatened to kidnap staff members and steal their hair if ROBLOX declined their offer. According to Roblox, this group caused 3.7 million dollars worth of damage.[103] The group also began sabotaging ROBLOX's YouTube channel by uploading offensive videos and ads towards users who clicked on it, which caused the platform to ban the channel in July 2019.

In 2011 even mid-tier MMOs released subscription-based multiplayer games.[57] An example of this is Star Wars: The Old Republic, which charges \$15 per month or \$150 per year for access to its game content. World of Warcraft offers paid subscriptions through its Battle.net platform and has done since 2007.

After you have registered your account with the application, then it will not take much time at all for everything to get set up. However, since the generator is powered by advertisements, you might encounter a lot of ads that are popping up after you have connected your account. It will be up to you to decide whether or not to continue using the application or to go for another one.

ROBLOX announced the launch of an app called ROBLOX Studio in July 2009, which allows players to make 3D videogames using ROBLOX Soft, or Lua scripting. These games can be shared on the website and with friends via social networking and email, making the virtual world even more alive than ever before. The app is free, but users must pay for revenue sharing of their games. On January 30, 2014 ROBLOX released its first app exclusively for iOS devices called "ROBLOX Studio" which puts a lot of its features into a more user-friendly format that previously had to be accessed through two separate products.

In 2010, ROBLOX updated their entire website to match the current version of their branding. The new design was made to be sharper and cleaner than the former one, and removed many visual effects that were seen as archaic and dated. A few key features of this change include a slightly larger "R", as well as a background shape for it similar to that of a "double-r", which ended up being used for every future iteration of the logo. This design is still used on the website today, albeit with variations in how it is utilized.
