In 2012, ROBLOX launched a new feature called Builders Club which allows players to create their own games. Builders Club costs 10 ROBUX to join and provides a variety of benefits such as allowing players to create games, more options for game creation including scripting (Lua, in ROBLOX's case), increased visibility, can use the "Builders Club" tag in places like their profile and group titles, ability to add new hats to the catalog, t-shirt sales in online store.

On August 15, 2017 (12:00 PM), ROBLOX released a new website design. This redesign adds a many features and improvements such as new search function, expanded news section, easier access to games and groups/communities, expanded mobile version of the site, ability to message anyone on the website regardless of whether they are a user or staff/trade with users without the need to add them first (members must have this feature enabled), expanded trades panel with detailed card information, ability to cancel trades before they are completed when there are no funds involved on either side of the trade to prevent scams that involve giving out items for free and getting items or money in return but never giving back the items that were given.

One example of a troll game, created in 2005, was "Uppercut". This involved players being knocked into the air when they attempted to create their character. However, when the player hits the ground, they were shown a message saying that the creator of this game had disabled their inventory and that they had been defeated.

In 2015, a study concluded that children under 15 years old had made up 38% of Roblox purchases, which was far less than the games with similar genres such as "Minecraft" or "Grand Theft Auto". However, the study also concluded that players over 15 years old had made up 56% of Roblox purchases. This is because they have more money and influence. In addition, the study reported that Roblox is being used for a variety of purposes such as learning about engineering and architecture.

ROBLOX has official clients for Windows, macOS, Linux, iOS, Android, Xbox One, and PlayStation 4. ROBLOX also has a game engine called "Build" which can be downloaded for free to those wishing to develop games for their website. Although not officially supported by ROBLOX themselves, the client source code is also available on GitHub. As such, there are unofficial ports of ROBLOX to other platforms not supported officially by ROBLOX such as Xbox 360, Raspberry Pi and Tizen. An early attempt at an iPhone port in 2010 was unsuccessful due to concerns over the stability of the platform and a lack of toolchain support.
