Moon Active's "Coin Master" series has been translated into different languages due to its open source nature. Coin Master: Space Invaders has received a tiered rating of 4.8 out of 5 stars (out of 7 votes), with a user review stating that "Coin Master: Space Invaders is a great game, well worth the full price" while describing it as "The original coin master (with) a few twists". After releasing Coin Master in 2004, Moon Active has continued to release improved versions in different languages and formats.",

Best game ever!!! by Vampiregirl134567 on 2015/03/08 07:48 This game is amazing and super fun! It's very addicting when you're bored. The only problem is that when you're playing the coin challenge you can't move to the next level until you complete a certain amount of puzzles, which means that when you complete it, you can't play it anymore. Other than that it's a great game :)",

On July 1st 2018 CoinMaster Coins And Curses Adventure went out of Beta Testing for iOS and Android. Coin Master won an honorable mention in the 2015 Indie Royale Awards for "Best Card-Based Game". It was also featured in the December 2016 edition of PC Gamer.",

The "Coin Master: Puss in Boots "(Kasegi 2: Bukini no Tane)" hack enables players to get unlimited coins and gems. By removing the gems from your inventory, you will still have the game unlocked as well as all the features that come with it! You can install the mod in two ways: permanent and temporary. You can use the permanent version to avoid any in-app purchases or data loss. The tool also contains a blacklist which you can use to block certain games from being hacked. This means that if you encounter a game that has been blacklisted by your device, then it will not be hacked by our tool. The temporary version is meant for people who do not want to use the permanent version, and it is a safer way to get your game hack. Download [Android - Permanent]",

"Coins & Curses" received mostly positive reviews, with reviewers generally praising the humor and simplicity of the game. It currently holds a Metacritic score of 81/100 for iOS, 82/100 for Android and 86/100 for PC.",
